EDUCATION

Georgia State University
Expected May 2023

Bachelor of Science in Computer Science — Atlanta, GA

GPA: 4.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Data Mining, Software Engineering

EXPERIENCE

My-Daily-Cup
Mar 2022 – Apr 2022

Full Stack Web Application — Atlanta, GA

- In a team of four, we created a web-based personalized blog site, where our users could make journal entries, create tasks that need to be done and retrieve data such as weather and the top news stories in the form of displayable widgets.
- Created our user's journal page, where they add new entries, delete old entries, view past journal entries that they've made or filter their journal entries based on their emotions
- Used Git to manage our code and used a popular Unit Testing framework called "unittest", to make sure that all provisions to the code was fine.
- Our GitHub repo was being continuously deployed with Heroku, where it accessible for use by the public.

Movie Discovery
Feb 2022 – Mar 2022

Full Stack Web Application — Atlanta, GA

- Created a full stack web application which allows the users to discover new movie, while also allowing them to rate and review movies they have seen.
- My web app is served using Flask's framework and uses PostgreSQL, which is a database system compatible with our python code, to store movie ratings and comments.
- Git was used to manage and safely add to our program, while also being pushed to Heroku, where it would be deployed and accessible to the public. Github link: https://github.com/ibell8/Movie_Discovery

Chat Application
Dec 2021 – Feb 2022

Android App developer — Atlanta, GA

- Created an android app using Dart and Flutter that allows our users to message and have conversations with other users of the app.
- App uses Google Cloud Fire store to keep track of all messages sent in a conversation between two users and manages each user who creates an account.
- Integrated Shared Preference to store data and manage the user login sessions, which will persist even after closing the application.
- Github link: https://github.com/ibell8/ChatApp

Aventura Medical
May 2017 – Aug 2018

Website Manager/Production Worker — McDonough, GA

- Managed and helped design the front-end of the Company's webpage.
- Performed numerous different tasks and processes in a manufacturing environment.
- Worked on developing newsletter for the month May and June.
